

A NEW ERA IN ALL-HAZARDS COMMUNICATIONS HAS BEGUN...

CentraAlert® EOS™, the world's first plug and play emergency operating system, brings you affordability, scalability, and true interoperability like never before. Whether you need to activate a single device, or alert an entire community, CENTRALERT® EOS™ makes it easy.

With our patent-pending modular design, you can select the system that's right for you. Start small and add modules as budget allows. Or, integrate your entire alert and notification process at once. Either way, you're in control!

And with our universal interface, operations are simplified via the standardized activation screens. This assures that your communications reach the right people at the right place at the right time. With CENTRALERT® EOS™, a new era has begun.

NETWORK MESSAGING MODULE

The CENTRALERT® Network Messaging module provides

computer pop-up messages to users or groups of users across your network or through the Internet to a variety of wireless devices, including laptops, cell phones, smart phones, pagers, faxes, or Ethernet-enabled radios. Emergency messages are displayed prominently on the top view requiring user acknowledgment. Other uses include meeting reminders, internal communications, and special announcements.

With CENTRALERT® . . . You're In Control!™
