A NEW ERA IN ALL-HAZARDS COMMUNICATIONS HAS BEGUN...

CentraAlert® EOS™, the world's first plug and play emergency operating system, brings you affordability, scalability, and true interoperability like never before. Whether you need to activate a single device, or alert an entire community, CENTRALERT® EOS™ makes it easy.

With our patent-pending modular design, you can select the system that's right for you. Start small and add modules as budget allows. Or, integrate your entire alert and notification process at once. Either way, you're in control!

And with our universal interface, operations are simplified via the standardized activation screens. This assures that your communications reach the right people at the right place at the right time. With CENTRALERT® EOS™, a new era has begun.

With CENTRALERT® . . . You're In Control!™
